

Canada china electric vehicle market

Overview

The electric vehicle market in this country is about to take a sharp turn. Prime Minister Mark Carney is reopening Canada to Chinese-made EVs, lowering a 100 per cent tariff on imports, imposed in 2024, back to six per cent. Prime Minister. Compounding the climate threat, Canadian politicians also raised the cost of new electric vehicles (EVs) by thousands of dollars. But is it all good news?

Ivey's Gal Raz breaks it down.
