

Home Solar Power Generation Agreement

Overview

A solar Power Purchase Agreement (PPA) is an arrangement in which a solar provider installs and owns the solar system on your property at little or no upfront cost, and you agree to buy the electricity it produces at a set price per unit, typically lower than your utility rate. Unlike owning panels, you do not own the equipment in a PPA, which means you avoid upfront costs but miss out on federal tax. Tina Orem is an editor and content strategist at NerdWallet. She has a degree in finance, as well as a master's degree in journalism and an MBA. A solar company or PPA provider covers all the costs associated with purchasing and installing solar equipment on your roof.
