Battery Cabinet

Overview

IP54: Often used in traffic signal cabinets to protect sensitive electrical components from rain and splashing water. For equipment manufacturers and engineers. On-Line UPS systems use a double power conversion system to produce a pure sine wave output and zero transfer time to battery to provide the highest level of power protection. The UPS Family is the Eaton brand name for a particular type of UPS. When the physical security of data is the priority, IP54 enclosures are the best solution. Secure all your industrial applications that require protection from dust and. Their International (or Ingress) Protection IP rating system defines an enclosure's protective capacity, and then assigns an IP Code.
