Power supply says solar power generation can give you money back

Overview

Solar buy back programs, also known as net metering or feed-in tariffs, allow homeowners with solar panels to sell the excess electricity they generate back to the grid. This means you can earn money or credits on your electricity bill for the energy you do not use. This article examines the details of buyback solar energy, explains how the process operates, outlines its numerous advantages. California Assembly Bill 920 allows PG&E and other state utilities to offer payment for surplus energy sent back to the electric grid by your home renewable energy systems. Our NSC program is based on this bill. Get answers to queries about NSC.
