

Scalable Payment Methods for Solar Containers for Agricultural Irrigation

Overview

This study explores the design and adaptation of a shipping container into a portable irrigation control station for agricultural operations. SunCulture's Lipa Pole Pole. Irrigation in remote areas – Unlike traditional electric or diesel-powered pumps, solar-powered systems work in off-grid locations, ensuring water access where conventional infrastructure is lacking. Eco-friendly – Solar energy is a clean, renewable resource, reducing carbon emissions and promoting. ions from irrigated agriculture. The sustainability of SPIS greatly depends on distribution of irrigation water. SPIS can be applied in a wide range of scales, from individual or community vegetable garden parts of a farm or scheme.
