Wireless access point

OverviewConnectionsWireless data standardsWireless access point vs. ad hoc networkLimitationsSecuritySee also

In computer networking, a wireless access point (WAP) (also just access point (AP)) is a networking hardware device that allows other Wi-Fi devices to connect to a wired network or wireless network. As a standalone device, the AP may have a wired or wireless connection to a switch or router, but in a wireless router it can also be an integral component of the networking device itself. A WAP and AP is differentiated from a ho...
