

Which long-life IP66 battery cabinet is best for use on islands

Overview

In marine applications, you should choose a battery enclosure with an IP rating of IP67 or higher for maximum protection. When you install lithium battery packs on marine vessels, higher IP ratings help. In our experience, IP56 is rarely the “go-to” for high-end industrial equipment because if you're going to seal a battery against powerful water, you might as well make it dust-tight too. Among the most common ratings you'll encounter are IP65, IP66, and IP67. Plus how easy it is for individuals to access the potentially hazardous parts within the enclosure. Features: Single dome light is perfect underneath an RV kitchen cabinet or inside an enclosed trailer Low-voltage cutoff at 11V DC prevents battery drain Included energy-efficient, cool white LEDs Use.
