

Wind-magnetic fan converted to generator

Overview

Transform your ceiling fan into a wind turbine by disassembling it carefully. Keep the key parts like the stator and shaft. In this exciting video tutorial, we will guide you step-by-step on how to create your own DIY wind generator from an electrical fan. Use a full bridge rectifier to. Are you ready to turn an old ceiling fan into free, renewable energy?

Imagine harnessing the power of the wind to generate electricity for small projects, emergency power, or just as a fun DIY experiment! In this guide, we'll walk you through the step-by-step process of transforming a simple. The PC Fan is Brushless DC (BLDC) Motor. I also found this great little tool on eBay for only \$36 from [here](#).
