This paper examines the spatiotemporal evolution and convergence of energy-related carbon emission efficiency in the Yangtze River Economic Belt (YREB) using prefecture-level data ...

The ecological protection of the Yangtze River Economic Belt (YREB) is one part of China's national strategy, and to identify the spatiotemporal variation of ecosystem service values (ESV) and examine ...

For this purpose, this paper uses the super-efficiency SBM model, ML index and Tobit model considering undesired output to explore the energy efficiency and the main factors affecting it of nine ...

A subsidiary of China National Offshore Oil Corporation (CNOOC) has completed the construction of China's largest LNG storage base, a move that aims to ensure energy security and ...

A subsidiary of China National Offshore Oil Corporation (CNOOC) has completed the construction of China's largest LNG storage base, a move that aims to ensure energy security and support green ...

Through the integrated index model and barrier degree model, a quantitative analysis is conducted to explore the dynamics and potential mechanisms of energy transition in the Yangtze ...

By deploying energy storage solutions effectively, Yangtze River Energy Storage not only enhances energy reliability but also contributes significantly to environmental conservation efforts.

Here, we focused on the Yangtze River Delta (YRD) urban agglomeration in China and proposed an optimization framework for energy, environment, and economy.

Located on China's longest river Yangtze, approximately 44km from the city of Yichang in Hubei province, the hydroelectric facility generated its first power in July 2003 and achieved its full ...
