-----

The grid-tied solar inverter Sungrow SG350HX-20 is a professional solution for large industrial and commercial power plants. With an output power of 350 kW, three-phase connection, and twelve ...

The CPS 350 kW three-phase string inverters are designed for large-scale ground mount applications. The units are high performance, advanced, and reliable inverters designed specifically for the North ...

With our high current rated DC inputs, systems can realize full capacity as well of their PV modules. Our system supports ease of installation with MC4 connectors, while maintenance is streamlined with ...

In the spirit of innovation, specifications and features are subject to change without notice.

Multi-mppt string inverters from Sungrow, sg350hx, are proven safe for 24h real-time AC and DC insulation monitoring and reach a high yield of 99% at a low cost.

With enhanced safety, optimal LCOE, and ensured cost-effectiveness, the high-performance UT inverter provides a future-ready solution for utility-scale PV projects.

With a nominal AC power of 350 kW and six independent MPPT trackers, each with 5 strings and up to 75 A input current per tracker, it enables precise power optimization and maximum energy yield.

The SolaX X3-GRAND HV is a 350kW ground-mounted string inverter delivering 99% efficiency with 6 MPPT trackers for optimal energy harvest. It features Type II SPD protection, AFCI (optional), and ...

An NRTL approved, effective alternative to central inverters, these inverters modular design building blocks that provide high yield and. and 12/16 MPPTs for maximum energy harvest. For detailed ...
