Energy efficiency is a top priority for data centers. Power demand is surging, driving a sharp rise in rack densities--and with it, the need for high-density rack PDUs to reliably support ...

While a standard rack uses 7-10 kW, an AI-capable rack can demand 30 kW to over 100 kW, with an average of 60 kW+ in dedicated AI facilities. This article provides a condensed analysis ...

Scalable to 60kW per rack, the InRow RC's small footprint and modular design allows for placement within the row of racks to provide predictable, reliable, and cost effective cooling ...

the cycle continues. The capacity of each unit is scalable from 40kW to 60kW simply by adding fans -- 40kW equals four fans with 60kW achieved with six fans. An added benefit of the new technology ...

American Power Conversion (APC) has unveiled new high density InfraStruXure(TM) systems that can scale up to 60kW per rack. According to APC, these are the first integrated ...

The Vertiv(TM) DCE Rack System is designed to meet the flexibility, ease of installation, and delivery requirements of modern data centers, and is available in pre-configured or customized builds.

Designed to increase flexibility and agility of data center power distribution through a design that does not require a raised floor.

Switched power distribution unit for data centers. 60kW smart PDU with rack mount compatibility.

Enable breakthrough medical research, imaging, analytics and more with healthcare data centers purpose-built for AI and high-density computing.

The Amphenol Network Solutions Data Center Rack is the ultimate rack solution for core data center equipment. Amphenol data center racks provide a seismic certified, highly durable and versatile ...
