What is a dry container?

1. Dry Container (Standard Container) A basic, enclosed steel container used to ship dry, non-perishable, and non-temperature-sensitive materials. Ideal for packaging PVC Resin, colorants, and other bagged or palletized solid chemicals.

What features ensure safe storage of liquids in intermediate bulk containers?

Following our previous guides on IBC components and inner bottles, this third instalment explores two critical features that ensure safe storage and handling of liquids in Intermediate Bulk Containers: ventilation systems and discharge valves. Meet Industrial Packaging There!

What is an insulated container?

Insulated Container A container with thermal insulation that helps maintain a stable internal temperature (without active refrigeration). Ideal for chemicals sensitive to extreme temperatures but don't need active cooling -- like foam hardeners or non-reactive polyols.

What is a reefer container?

Reefer Container (Refrigerated Container) A temperature-controlled container that maintains a consistent environment throughout the journey. Perfect for temperature-sensitive chemicals like certain prepolymers, specialty Polyols, or additives that degrade if exposed to heat or cold.

Learn about different types of bulk chemical packaging, from stainless steel and plastic IBCs to ISO containers, and their uses across a range of industries.

Protect parts during shipping to an assembly plant without the need for waste. This was the challenge we set ourselves and which we solved it with the Hybrid Box. It looks like a simple ...

The Different Types of Chemical Packaging: Ensuring Safety and Efficiency In the chemical industry, packaging is of paramount importance. Chemical packaging is far more robust ...

In this article we discuss the different chemical packaging types and their application for your hazardous materials & liquids.

# A hybrid type of folding containers for an Irish chemical plant

Here's a detailed guide to the top 10 shipping container types, specifically for chemical products like Polyurethane, Polyols, PVC Resins, Silicone Surfactants, and more, with practical examples.

The Combo Excelsior® is strong and durable: its double wall structure enables a 1500kg unit load and a stack load of 8000kg (4 on 1). Maximum safety when stacked full thanks to the T shaped locking ...

Nordcontenitori manufactures plastic containers for the chemical industry-from preservation, storage, and transportation of substances and chemicals.

IBC for chemicals Certified stainless steel IBCs guarantee safety and hygiene for the chemicals industry. All reusable containers are suitable for the transport, storage and further processing of paste-like, ...

Industrial Packaging offers customers manufacturing expertise, flexibility & innovative thinking. We create robust bulk packaging solutions for every need.

Chemical packaging must protect products, people and places. Find out how rigid plastic and metal containers do just that in this article.
