One million solar panels lie abandoned in the desert. Uncover the story behind America's lost renewable energy potential. Act now!

The solar company was sent pictures of the updated roof, and came for a site assessment. They let me know after the site assessment that they could not fit the same number of panels on just the south side.

FILE PHOTO: A solar installer from Baker Electric installs a solar panel on the roof of a residential home in Scripps Ranch, San Diego, California, U.S. October 14, 2016.

Picture this: A shiny array of photovoltaic panels installed with fanfare in 2015 now sits abandoned on a suburban rooftop, collecting dust instead of sunlight. This isn't science fiction - the International ...

Ivanpah became the perfect example for his argument. Two billion dollars, two million panels, thousands of dead birds, and an early shutdown. The irony is that other renewable projects ...

Stranded Solar Systems, sometimes called Solar Orphans, refer to abandoned or neglected solar energy installations or projects that are left incomplete or non-functional by the original contractor or ...

Solar company closures are leaving orphaned systems behind. Learn why this happens and how homeowners can get their solar back online.

A massive solar farm of two million panels in the Mojave Desert is heading for dormancy just 11 years after going into operation. The Ivanpah installation was once the largest project of its ...

Two years later, the panels have never been switched on and the company that installed them--Titan Solar--has abruptly gone out of business, leaving Palmer with a shiny but useless array ...

Abandoned rooftop solar photovoltaic panels

Don't let your solar investment go to waste. Whether you need panels removed for a new roof, a system reinstalled, or simply a trusted partner to take over where others left off, CellSun is here to help.
