The Department of Energy's (DOE) Energy Storage Strategy and Roadmap (SRM) represents a significantly expanded strategic revision on the original ESGC 2020 Roadmap.

States can establish energy storage procurement targets to jump-start the development of energy storage systems. These targets set a required amount of energy storage, typically expressed ...

This 2026 outlook highlights five key trends shaping the year ahead, along with associated risks and opportunities, and actionable strategies. Policy shifts: Adapting to a changing energy landscape ...

Delivered quarterly, the US Energy Storage Monitor from the American Clean Power Association (ACP) and Wood Mackenzie Power & Renewables provides the clean power industry ...

State lawmakers across the United States made efforts in the second quarter of 2025 to modernize electric grids, according to the 250 States of Grid Modernization: Q2 2025 Quarterly ...

CEG provides information, technical guidance, policy and regulatory design support, and independent analysis to help break down the barriers to energy storage deployment and advance the ...

We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U.S. power grid in 2025 in our latest Preliminary Monthly Electric Generator Inventory ...

The new law requires the Maryland Public Service Commission to establish the Maryland Energy Storage Program by July 1, 2025 and provides for incentives for the development of energy ...

The National Renewable Energy Laboratory (NREL) publishes benchmark reports that disaggregate photovoltaic (PV) and energy storage (battery) system installation costs to inform SETO's R& D ...

Advanced photovoltaic and new energy storage policies

The report says many existing power plants that are being shut down can be converted to useful energy storage facilities by replacing their fossil fuel boilers with thermal storage and new ...
