Can solar photovoltaic projects improve poverty alleviation in China?

We propose several policy recommendations to sustain progress in China's efforts to deploy PV for poverty alleviation. There lacks a comprehensive analysis on the large-scale deployment of solar photovoltaic projects and its impact on poverty alleviation.

Are photovoltaic poverty alleviation projects a social welfare project?

Energy poverty is a serious problem worldwide and has attracted the attention of policymakers. As a type of social welfare project, photovoltaic poverty alleviation projects (PPAPs) are expected to achieve high-quality poverty alleviation and an energy transformation in China.

How to promote PV poverty alleviation based on local solar resource endowments?

Policy Recommendation 1: Plan Photovoltaic Deployment Based on Local Solar Resource Endowments. The implementation and promotion of PV poverty alleviation policies should be guided by the solar resource endowments of each locality and follow a framework of scientific and rational planning.

Can solar photovoltaic projects help alleviate poverty in rural areas?

Nature Communications 11, Article number: 1969 (2020) Cite this article Since 2013, China has implemented a large-scale initiative to systematically deploy solar photovoltaic (PV) projects to alleviate poverty in rural areas.

The solar energy for poverty alleviation program (SEPAP) in China aims to add over 10 GW of solar capacity to benefit over 2 million citizens by 2020.

According to the 2017 Photovoltaic Poverty Alleviation Work Promotion Plan, County X is a national designated poor county on the list of Henan Province's pilot projects.

There lacks a comprehensive analysis on the large-scale deployment of solar photovoltaic projects and its impact on poverty alleviation. Here the authors show that solar photovoltaic poverty ...

The team also found that the extent of poverty alleviation varied strongly depending on the region of China in which a PV project was installed.

# Are photovoltaic panels a national poverty alleviation project

Does national policy regulation support photovoltaic poverty alleviation? Although the benchmark feed-in tariff for photovoltaic power decreases continuously, and power grid parity for renewable energy is inevitable, national ...

Energy poverty is a serious problem worldwide and has attracted the attention of policymakers. As a type of social welfare project, photovoltaic poverty alleviation projects (PPAPs) ...

China's PV poverty alleviation project is a key initiative that is intended to alleviate rural poverty within the framework of sustainable development. The project provides rural households with a stable income ...

This study leverages panel data from 832 national-level poverty-stricken counties between 2010 and 2020 designated under China's 2011 Poverty Alleviation Outline, using the late-2017 launch of the first ...

Abstract. Photovoltaic-based targeted poverty alleviation (PVPA) has been established for 10 years with the mission of one of "the ten large-scale poverty relief programs" in China. This paper would firstly examine the ...

China implemented a solar photovoltaic (PV) poverty alleviation (PVPA) policy of building nearly 0.24 million PVPA power plants in 2014-2020 to fight poverty. However, our current knowledge of its effects, ...
