Can a solar panel be installed on a roof?

If you wish to install a solar panel on your roof building regulations will normally apply. The ability of the existing roof to carry the load (weight) of the panel will need to be checked and proven. Some strengthening work may be needed. Building regulations also apply to other aspects of the work such as electrical installation.

Do I need permission to install a solar panel?

Generally, any solar panel installation under 1MW is permitted without any additional approval required. Similarly to domestic installations, for no permission to be requested, there are several regulations to be met for commercial solar panel installations.

Can I install my own solar panels?

Installing your own solar panels can be legal and cost-effective, but navigating the regulations requires careful planning. Most states allow homeowners to install solar panels themselves, provided they obtain proper permits, follow local building codes, and pass required inspections.

What happens if you install solar panels without planning permission?

If you install solar panels without the necessary planning permission or in breach of regulations, you could face several legal and financial consequences, including the removal of your panels, fines, legal action, compromised insurance policies, and personal risks such as to your safety and diminished property value.

Lawhive provides local UK solicitors for half the cost of a law firm. Connect with licensed solicitors online. Use any computer or smartphone.
