---

This is the product of combining collapsible solar panels with a reinforced shipping container to provide a mobile solar power system for off-grid or remote locations.

Our container solution provides access to the basic needs of electricity and water. Solar panels can quickly be deployed, the battery started, and then an emergency electricity supply becomes available.

Each unit combines high-performance lithium batteries, hybrid inverters, and MPPT charge controllers in a single outdoor ready enclosure, allowing for fast installation, minimal site preparation, and simple ...

A DIY solar battery box with a capacity of 640Wh and a power output of 500W costs less than \$570. This will give you enough energy to power lights, a phone, a laptop, a TV, and an electric ...

We are a factory specialising in the field of solar inverter and solar energy storage system. With advanced intelligent production lines and an experienced production team.
