Fully automatic MC4 connector pin crimping machine can cut wire, strip insulation, crimp terminal on both side of the solar panel cables. An ideal solution for mass processing of solar wiring harnesses.

iCrimp supplies a comprehensive range of solar PV tools for your solar projects, ensuring gas-tight, corrosion-proof, and weather-resistant crimps.

Full closed loop flexible wire feeding system, rubber belt feeding device to protect the wire surface from damaging, increasing the wire feeding accuracy. It uses network drive system to meet the industrial ...

It can be equipped with pressure monitoring system, monitoring the pressure during the whole processing and 100% traceability.

This MC4 Connector Crimping Tool & Automatic Wire Stripper is the ultimate tool for building and maintaining reliable solar connections. With its automatic self-adjusting stripping mechanism, you'll ...

The CRIMPFIX ECO automatic crimping machine is the ideal solution for processing PVC conductors with wire end ferrules in the field of panel building. Due to its robustness and compact design as well ...

Introducing our fully automatic photovoltaic cable MC4 connector crimping machine, designed to streamline and optimize the process of crimping MC4 solar connectors. This state-of-the-art machine ...

Automatically feed photovoltaic wires, half-stripping end A, and automatically crimping terminals on end B; Counterweight single-axis pay-off machine (used for shaft installation) or equipped with pay-off ...

It mainly focuses on the automotive, photovoltaic and new energy industries and has developed and produced a series of automatic processing equipment with high quality, stable performance and high ...

Automatic wire crimping machine for photovoltaic panels

The PV Connector and Crimping Tool Kit is an efficient solution for installing and maintaining solar power systems. It includes a standard PV connector, a professional ratchet crimping pliers, and an ...
