-----

The FPR-ESS-5015kWh-L-1500V is perfect for large-scale applications, including grid stabilization, renewable energy integration, and industrial power management.

Base station energy storage cabinets are critical components of telecommunications infrastructure designed to ensure reliable power supply, support renewable energy integration, ...

Support max. 4 cabinets in parallel, friendly for medium-sized project integrators.

This series of products integrates battery PACK, BMS system, high-voltage box, power distribution unit, temperature control system, and fire protection system. It is designed in a cabinet style, which is ...

373kWh rack systems can be paired with 1500V PCS inverters to complete fully functioning battery energy storage systems. The battery pack, string and cabinets are certified by TUV to align with ...

Introduce safe and efficient clean energy to achieve energy-saving, low-carbon operations and stable, secure performance for communication base stations.

This design supports both daisy-chain and controller area network (CAN) interfaces for a stackable communication up to 1500V battery energy storage systems. These features make this reference ...

Unlocks the potential of renewable energy applications with compact, powerful solution, designed for optimal performance and sustainability. Features sophisticated integration for seamless operation ...

Electrical selection compatible with 1000-1500V. also adds 24VDC, which can support black start. Modular PCBA design with convenient expansion for level 2 and 3 (BAMS/ESU). Hot plug design, ...

This reference design fits stackable high-voltage battery energy storage systems used in large scale utility solutions, industrial and commercial UPS as well as storage for domestic use.
