-----

The 13% tax rebate on exported solar panels -- a cornerstone of China's low-cost dominance -- has been discontinued.

The reduction in subsidies could place additional strain on China's solar industry, which is already grappling with overcapacity and plummeting panel prices that threaten the viability of smaller ...

China's top economic planning agency said on Sunday it was taking steps to scale back subsidies for renewable energy projects after a boom in solar and wind power installations.

China will cut export subsidies for solar panels and batteries in the coming months, a move mainly aimed at curbing domestic overcompetition and consolidating two sectors where China ...

BEIJING, 10 February 2025 - In a move to reshape the global renewable energy landscape, China announced that it will reduce subsidies for wind and solar projects after achieving its clean energy ...

Reduced solar subsidies could add pressure on China's solar industry, where overcapacity relative to global demand has led to a drop in module prices.

These achievements were largely driven by generous subsidies and guaranteed pricing mechanisms that incentivized renewable energy producers to sell to the grid. However, the NDRC ...

Despite the high levels of subsidies they have received over the last two decades, Chinese manufacturers of solar panels have experienced severe economic difficulties in recent years.

China has increased its solar subsidies tenfold to \$137 million for 2024, focusing on rural power and R& D. Learn how this massive investment impacts the solar industry.
