Such developments are vital for improving energy security and reliability across the state and beyond. By providing substantial energy storage, these facilities can help mitigate fluctuations ...

Massachusetts is making a big push for batteries -- not the kind you put in a flashlight, but powerful, tractor trailer-sized batteries that store energy for the electric grid. State officials say...

We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U.S. power grid in 2025 in our latest Preliminary Monthly Electric Generator Inventory ...

Flatiron Energy has received approval from ISO New England for a 300-MW/1,200-MWh battery energy storage system in Boston, Massachusetts. The authorization includes the construction ...

Learn about DPU's battery storage activities.

ISO New England has given the thumbs up to a project proposed by Flatiron Energy and envisaging the installation of a 300-MW/1,200-MWh battery energy storage system (BESS) in ...

With global energy storage demand projected to triple by 2030, Boston's export-ready solutions position international buyers at the vanguard of sustainable power infrastructure.

A rendering of the proposed battery energy storage system by Mission Clean Energy in Blandford.

As outlined in the recent presentation for the local community, Flatiron is proposing to construct a 168MW BESS, known as Salt Cod Storage, at the former coal-fired Montaup Power Plant ...

Large-scale battery storage isn't new, but as more projects appear across Massachusetts, residents are asking the right questions: Why do we need this? Is it safe? They ...
