China is leading this surge by a wide margin. In the first half of 2025, the country installed more than twice as much solar capacity as the rest of the world combined, accounting for 67% of...

So there is a lot of uncertainty in the Chinese solar industry, but there are also irrefutable facts: China needs to continue to expand domestic solar capacity to reach its climate target....

China has emerged as a global leader in solar energy production, boasting the largest solar capacity in the world. The country has invested heavily in solar technology, resulting in a ...

Now, as a Wired deep dive explains, China can pump out a full terawatt worth of solar panels each year. According to China Daily, the country's solar capacity grew at a compound rate of...

China is on an absolute tear installing wind and solar power. The country reached nearly 900 gigawatts of installed capacity for solar at the end of 2024, and the rapid pace of building has...

China's solar power capacity is on course to surpass coal this year A sunset glow lights up wind turbines and rows of solar panels at a wind farm in Qingyang, Gansu province, China.

The growth of solar power industries worldwide has been rapidly accelerated by the growth of the solar market in China. Chinese-produced photovoltaic cells have made the construction of new solar ...

China is adding more solar and wind power to its energy grid than any other economy - but that huge buildout has its challenges. Here's what we can learn

Utility-scale solar power capacity in China reached more than 880 gigawatts (GW) in 2024, according to China's National Energy Administration. China has more utility-scale solar than ...

China's solar ambitions are emblematic of its broader race toward a green energy future, driven in part by

Can China use solar power generation

Beijing's interest in becoming less reliant on imported oil and natural gas.
