The project marks a significant milestone as Cabo Verde's first large-scale renewable energy initiative to combine wind power generation with battery energy storage systems (BESS).

This expansion includes the installation of two 5 MW wind turbines and a 5 MW/h energy storage system, further reinforcing Cabo Verde's commitment to green energy (reaching 50% renewable ...

Cape Verde has installed battery energy storage systems across four islands, Santiago, Boa Vista, Sao, and Sal. The BESS is expected to reduce the obstacles that were previously ...

The energy storage arm of Chinese solar PV inverter manufacturer Sungrow announced the signing of an agreement earlier this week with renewable energy company MSR-Green Energy (MSR-GE) for ...

Cape Verde accelerates renewable energy goals with EUR45 million wind farm expansion and battery storage project. This collaboration between Cabeolica and international financiers boosts wind power ...

Gravity energy storage, or gravity batteries, is an emerging technology that utilizes gravitational potential energy for large-scale, sustainable energy storage.

As part of the EU's Global Gateway strategy, EIB Global is supporting this project, which is expected to contribute to the complete phasing out of Cape Verde's reliance on expensive and polluting fossil ...

On June 16, 2025, the African Development Bank (AfDB) approved a EUR19.6 million (\$22.6 million) financing package for the Phase II expansion of the Cabeolica wind project in Cape Verde. This ...

The largest energy storage project in Cape Verde is the Santiago Pumped Storage Project, which will be located in Chã Gonçalves, in the municipality of Ribeira Grande de Santiago.

Cape Verde Energy Storage Projects 2025

Announced earlier this week (8 December), AFC and Cabeolica have officially opened the Cabeolica Wind Farm and Battery Energy Storage System (BESS) project, which comprises an ...
