BYD, Chery, and top automakers present technical updates at China Solid-State Battery Platform 2026 meeting.

Top 10 Leading Companies in China's Solid-State Battery Industry Solid-state batteries are poised to revolutionize energy storage, offering higher energy density, improved safety, and ...

China's BYD is in the process of launching its EV powered by all-solid-state batteries, which feature solid electrolytes instead of liquid electrolytes.

Semi-solid-state batteries are already in mass production (energy density 500Wh/kg), and the all-solid-state battery pilot line has been completed with small-scale mass production ...

China's Chery Automobile is the latest to enter the solid-state battery race. The company claims to have developed a battery that can deliver more than double the driving range of today's...

Dongfeng Motor's sub-brand, Yipai Technology, announced on its WeChat page late last night that the company has begun testing a solid-state battery prototype in extreme cold weather...

China has officially launched its first production line for all-solid-state EV batteries, marking what could be a pivotal moment in the electric vehicle industry.

China's Dongfeng will launch a solid-state EV in 2026 with 620-mile range, rapid charging and strong thermal stability, marking major battery-tech progress.

This week, Chinese researchers disclosed they have achieved a crucial breakthrough in solid-state battery design--one that could enable electric cars to travel over 1,000 kilometers on a...

After introducing its first national standard for solid-state EV batteries on Tuesday, China is taking another big

China solid state ev battery

step toward bringing the promising new tech to market.
