---

Chint Power Systems is a global power systems provider, designing, manufacturing and supplying high reliability 1.5kW-1MW PV inverters and related power solutions for customers.

CHINT Residential Solar Power Solution utilizes idle rooftops and open spaces to create distributed PV systems, offering reliable, high-efficiency energy generation that can be used for self-sufficiency or ...

Top five! Chint power has won the 365 global photovoltaic ranking list!

The PV system has high power generation efficiency, safe and reliable performance, and can meet the requirements of various applications environmental conditions.

The typical products are PV inverter, storage inverter, lithium battery pack and EV charger that are widely applied to household, industrial and commercial new energy systems.

Best in class cost leadership driven by value engineering and world class supply chain efficiency.

Through our technologies and expertise, we are making deeper integration of solar power into various scenarios. The best way to boost economic benefits out of limited land availability.
