With the increasing penetration of renewable energy resources, ...

Chapter 1 (Market Evolution) provides historical policy and planning context to the evolution of California's market for stationary energy storage from about 2010 when California Assembly Bill 2514 ...

Due to increasingly complex state-of-charge management requirements and power market product optionality, storage asset owners and managers have turned to automated bid ...

Supply Chain Threat of PRC Influence for Digital Energy Infrastructure: Evaluating the Technical Risk Landscape 55 Grid and Utility ...

To ensure that a procurement process advances the best value option, asset owners should employ a set of recommended best practices for conducting comparative performance evaluations.

Abstract chapter offers procurement information for projects that include an energy storage component. The material provides guidance for different ownership models including lease, Power Purchase ...

With the increasing penetration of renewable energy resources, the demand for energy storage resources that can provide capacity--the ability to provide dispatchable energy--has ...

To address this question, we offer a combined qualitative and quantitative analysis on storage contract design in a central context. Specifically, we first enunciate a set of principles for ...

DOE's Energy Storage Grand Challenge supports detailed cost and performance analysis for a variety of energy storage technologies to accelerate their development and deployment.

Comparison of Automated Procurement Contracts for Energy Storage Containers and Batteries

In evaluating the appropriate contract structures for the initial procurement of utility-scale energy storage resources, stakeholders provided insights on two primary mechanisms: indexed storage credit (ISC) ...

Anyone developing a battery energy storage project should be prepared to address two main issues. The first, and the topic of an earlier article, is the general contracting structure.
