A globally interconnected solar-wind power system can meet future electricity demand while lowering costs, enhancing resilience, and supporting a stable, sustainable transition to net-zero emissions.

Battery, solar, and wind projects are getting killed in record numbers. Here's a map of all the cancellations so far this year.

Dec 22 (Reuters) - The Trump administration suspended leases on Monday for five large offshore wind projects that are under construction off the U.S. East Coast over what it called national...

The amount of offshore wind generating capacity that is under construction or planned in the United States is in flux after two projects in New Jersey were canceled last year.

The Department of the Interior announced today that it is pausing--effective immediately--the leases for all large-scale offshore wind projects under construction in the United States due to national ...

On his first day in the Oval Office, President Donald Trump signed an executive order that attempts to slow the growth in the country's wind generation capacity.

Many coastal states which had opposed land-based wind farms were betting they could rely on offshore wind projects instead. That many be impossible under the Trump Administration.

The Trump administration is suspending leases for five large-scale offshore wind projects under construction on the East Coast due to what it said were national security risks identified by the Pentagon.

On December 22, 2025, DOI suspended the leases for five fully-permitted, large-scale offshore wind projects
