What is a server rack battery?

A server rack battery is a rechargeable battery unit placed inside a server rack. Its main job is to supply power to IT equipment when the main electricity goes out. This prevents servers from shutting down suddenly,which could lead to data loss or system crashes. These batteries are often used together with a UPS (Uninterruptible Power Supply).

Why should you choose custom server racks & network cabinets?

Starting with flexible, easily installed, adaptable and pre-configured customized server racks and network cabinets saves you costs, footprint and it increases the performance, efficiency, and reliability of your critical infrastructure. Let's discover the data center custom containment solutions that help you reach your objectives.
