-----

The AI boom has upended the data center sector, forcing a rapid shift to liquid-cooled racks as facilities pivot from sub-10kW racks to 120kW racks.

For two 120kW racks of compute - each rack featuring 18 compute trays (72 Grace CPUs and 144 Blackwell GPUs) and nine NV switches, Meta utilizes four racks of cooling racks (two ...

Bidding for Data Center Equipment RFPs is extremely lucrative for companies of all sizes. Tendering authorities and private companies release thousands of contracts worth millions for ...

With just one click, users can access all the necessary documents for Data Center tenders, including RFPs, RFQs, BOQs, EOIs, GPNs, and prequalification documents (PQ docs).

Search all the data center facility projects, bids, RFPs, ICBs, tenders, government contracts, and awards in North America Region with our comprehensive online database.

The 12kW PSU combines gallium nitride (GaN) and silicon carbide (SiC) devices and complies with Open Rack v3 (ORv3) specifications and Open Compute Project (OCP) guidelines for ...

Learn how kW per rack impacts colocation pricing, energy efficiency, and performance. Discover best practices to manage power, reduce costs, and future-proof your IT infrastructure.

For the last decade, data center design was linear. We planned for 5-8 kW per rack. We treated the utility grid as an infinite well--we plugged in, and they provided. That era is ending.

To cool a 120kW rack with air, data centers would need fans spinning at such high speeds they would consume more energy than the servers themselves and generate noise levels hazardous ...

Beyond this point, the volume of air required to move the heat away from the chips becomes unmanageable.
