The objectives of this policy brief are to draw a brief picture of the current penetration of distributed energy resources (DERs) in India and provide policy recommendations to enable smooth penetration ...

The IESA Annual Report 2025 is a comprehensive reference that captures a pivotal year in India's clean energy ecosystem. It covers key dev...

In recent years, energy storage has gained momentum because of the need to integrate a higher quantum of renewable energy (RE) in the grid to meet India's climate goals.

The report, Strategic Pathways for Energy Storage in India Through 2032, tackles these questions. With its sharp analysis and data-driven approach, it maps out practical, affordable ways to roll out storage, ...

India has set a target to achieve 50% cumulative installed capacity from non-fossil fuel-based energy resources by 2030 and has pledged to reduce the emission intensity of its GDP by ...

In this context, the dramatic decline in energy storage costs--marked by a nearly 90% reduction in global storage prices over the last decade and recent energy storage auctions in India reflecting a ...

Appropriate Commissions may notify suitable regulations to encourage the deployment of distributed energy storage systems such as electric vehicle batteries, rooftop solar with integrated battery ...

This report provides an outlook on smart grid and energy storage sectors in India, key stakeholders involved, regulatory and policy scenarios, government initiatives, technology landscape, and current ...

Jakson is committed to driving India's transition to sustainable distributed energy through solutions like solar rooftop systems and battery energy storage systems. By focusing on renewable energy, we ...

Distributed energy storage operations in India

Developed a detailed Energy Storage Roadmap for India for deployment of different ESS technologies with timelines under various scenarios of VRE and EV penetrations
