What is the European 5G Observatory?

The European 5G Observatory tracks progress in 5G infrastructure deployment across the EU and other regions worldwide according to base stations deployment, edge nodes and infrastructure sharing agreements. Source: IDATE estimates and regulators' data. Reporting period: at December 2024. Source: IDATE estimates and regulators' data.

Will Serbian 5G auctions be transparent and technology-neutral?

The Chinese tech player holds a temporary licence to use the 3400 MHz (transmitting frequency) and 3600 MHz (receiving frequency) bands. Officials questioned this speculation, saying that Serbian 5G auctions will be transparent and technology-neutral, so that all operators have the right to purchase equipment from any manufacturer.

Which countries do not have base stations in the 26 GHz band?

Note: The following countries do not have base stations in the 26 GHz band: Austria, Belgium, Cyprus, Czechia, Greece, France, Hungary, Ireland, Lithuania, Latvia, Luxembourg, Malta, the Netherlands, Poland, Portugal, Romania, and Slovakia. Reporting period: at December 2024. Source: IDATE estimates and regulators data

When will the 5G auction take place?

The 5G auction, initially planned for 2021 but now expected to take place in 2023, will be for 3500-3800 MHz frequency bands. The Ministry of Telecommunications has yet to define the minimum conditions for granting individual spectrum licences.

The strategy, adopted by the Serbian government on 8 August, sets the timeline for the 5G rollout, starting with the auction for frequency allocation slated for late 2025. The deployment of ...

Explore an expert guide on 5G regulation and law in Serbia, covering current status, future plans, and frameworks. Ideal for telecom law professionals.

Interest in 5G spectrum was evident from the public call by RATEL in 2021, where four operators--SBB, Telekom Srbija, Telenor (now Yettel), and A1--expressed interest. For ...

Does Serbia have 5G base stations

A portion of mobile phone users in Serbia are no longer on the 4G network as of today, but on the 5G one. Three operators have obtained licences for the 5G network in Serbia: Telekom ...

Lucic noted that 1 million 50 thousand of its users have mobile phones that support the 5G network, adding that by the end of December, Telekom Srbija will have 1,050 active 5G base ...

Introduction The technological world has experienced significant progress with the introduction of the 5G network, which promises revolutionary changes in internet speed, connectivity ...

The European 5G Observatory tracks progress in 5G infrastructure deployment across the EU and other regions worldwide according to base stations deployment, edge nodes and ...

5G auction in Serbia opens new strategic opportunities for Sep 4, Temporary network capacity can be expanded at crowded events using micro base stations or drones. In short, 5G is a strategic platform ...
