Those projects are included in the MISO Transmission Expansion Plan (MTEP), an annual publication that is collaboration between MISO planning staff and stakeholders.

This module presents the steps to follow for the electrical design and cost estimation of a rural electric distribution project, to be used as input to the feasibility study.

Training courseware on budget quota for distribution network projects of 20kV and below

Unit prices and quantities are provided for various line components including poles, concrete, and structure sets to be installed as part of the network development.

7.3 Distribution Facilities 7.4.2 Allowable Minimum Clearance of Conductors and Environment 7.6.1 Feature of Conductors and Cables 7.6.2 Sizes of Conductors 7.6.3 Sag of Conductors 7.7.1 Type of Distribution Transformer 7.7.5 Location
Sizes of conductors should be selected taking into account amount of present load, forecasted load, short-circuit current, current capacity of conductors, voltage drop, power loss, mechanical strength, etc. Too many sizes should not be used for branch feeders.
