In addition to the rehabilitation, maintenance and improvement of distribution lines, the construction of a new substation in Comoro, Dili, stands out.

For over two decades, ESSET has delivered complex electrical installations across Timor-Leste from embassies and government facilities to large-scale commercial and industrial projects.

In Timor-Leste's post-conflict society, the government's pursuit of electrification to improve social cohesion through enhanced communication is an understandable initial driver for a newly established country.

The network consists of 85 base stations situated in hospitals and health centres throughout the country and mobile HF communications installed in 11 ambulances.

What is the "one port" project in East Timor? Equally significant is the "One Port" project. The Tiba Port project, constructed by China Harbour, is located 10 kilometers west of the capital Dili. The main body of the port is ...

Electricidade de Timor-Leste Empresa Pública (EDTL, E.P.) is the Timor-Leste's State-Owned Company in Electricity and Energy Sector, established based on the Decree Law No. 29/2020, of 22 July.

The initiative includes an online seminar programme and practical training activities, covering essential areas such as communications regulation, data governance, radio spectrum supervision and ...

For Yang, a Chinese engineer who has spent 13 years constructing national power grid across this island nation, the view stirs something deeper than scenery. "It's not just electricity," he...

ELC Electroconsult S.p.A. is a private and independent Italian engineering consultancy company operating in Hydropower and Dams, Geothermal, Transmission and Distribution, Environmental and Capacity Building ...

East Timor Electrical Engineering builds communication base station

The overall objective of this project is to develop, for the Government of East Timor, the Electrification Masterplan 2025 of East Timor based on Renewables Energies.
