How many energy storage projects are there in Europe?

There are 147 energy storage projects under construction in Europe, with a total capacity of 14 GW, according to the European Energy Storage Inventory, launched by the European Commission. The European Energy Storage Inventory comprises operational, under construction, permitted, and announced energy storage projects across Europe.

What is the European energy storage inventory?

The European Energy Storage Inventory comprises operational, under construction, permitted, and announced energy storage projects across Europe. A real-time dashboard for energy storage also includes their locations and technologies - chemical storage, electrochemical storage, mechanical storage, and thermal storage.

How has Europe's energy storage sector changed since 2020?

Since 2020, Europe's energy storage sector has grown rapidly, with different technologies progressing at varying speeds. Pumped hydro remains the largest contributor, accounting for 50.6 GW of installed capacity, including 500 MW added this year in Belgium and Austria.

Will Europe reach 100 GW of energy storage?

The EU, UK, Norway, and Switzerland together are expected to reach 100 GW of installed energy storage later this month, according to new analysis launched on Wednesday by LCP Delta and Energy Storage Europe. Since 2020, Europe's energy storage sector has grown rapidly, with different technologies progressing at varying speeds.

StarCharge is advancing its European expansion with the signing of a 500-MWh order for its energy storage system (ESS) technology with US renewable energy investor Energy Investment ...

Solarpro, a leading technological provider of solutions for the generation and storage of energy in Europe, has successfully deployed the largest battery energy storage system (BESS) ...

A new analysis from LCP Delta and Energy Storage Europe shows that pumped hydro storage holds the largest share of installed capacity at 50.6 GW, with battery energy storage systems ...

Disclaimer: The European Energy Inventory Storage dataset is mainly based on public data and data from Wood Mackenzie. Wood Mackenzie Limited, subject to any additional data modifications and/or ...

[BYD Eastern Europe Energy Storage Project put into operation] On January 29, 2026, BYD's 500MWh energy storage project in Bulgaria, in collaboration with European companies, was officially put into ...

SCU deploys a 1MWh energy storage container for a European factory to reduce peak power costs, enable grid trading, and enhance energy independence.

The energy storage system is located on a 25,000-square-metre site and is equipped with state-of-the-art technological solutions, including 110 battery platforms and 28 combined power ...

European Energy Storage Inventory - projects under construction by technology Europe currently has 913 energy storage facilities in operation, with a combined capacity of 67 GW. The ...

China Power Plant Energy Storage Project In a significant technological advancement, the country's largest "coal-to-power plus molten salt" storage project, located in Suzhou, east China's Anhui ...

Stationary battery manufacturer Hithium has successfully deployed the largest battery energy storage system (BESS) project in Eastern Europe to date, with a capacity of 55MWh.
