I am running 11 of the regular EG4 and one of the EG4-LL batteries. All 11 of the regular EG4 are in the BMS communication string to the growatt inverter and the LL version is not connected in the ...

Comprehensive EG4 battery guide covering all models, specifications, performance testing, and buying advice. Compare LifePower4, ...

Buy an extra pack of lifepower4 and your batteries will last longer with lower average DOD. A new consideration that's bothering me is that

Their flagship product is the EG4-LifePower4 lithium battery, offering a 5.12kWh capacity and 99.0% roundtrip efficiency, ideal for residential use. EG4 also offers the EG4-LL Lithium Battery (V2), a high ...

We actually are putting out a guide to allow EG4-LL and EG4-Lifepower4 batteries to communicate. Was this guide released? If no, any ETA? Would really...

The EG4's LiFePower4 48V v2 battery retains the robust performance of the original model, now with enhanced features for improved user experience and ...

I would recommend the basic EG4. The newer ones are the subject of much discussion about the precharge circuitry which is wonky with a few specific setups. Confirm that the basic one doesn't have the ...

Like the title says. I can't decide why I would pay more for the LL-S. I don't really need the fancy screen since I will be monitoring the battery thru the...

Q: How does the EG4-LL battery compare to other solar batteries on the market? A: The EG4-LL battery offers superior performance with a high energy density and a long lifespan.

Enable expanded communication for existing V1 EG4-LL Battery Banks by using a new V2 EG4-LL Battery

Eg4 II vs lifepower4

as your master battery. This feature will be available with a firmware upgrade.

The LL-S actually has a "UL listed" sticker on the battery and would pass an inspection. Even though the Lifepower claims to be UL certified, they don't place a sticker on it, which may cause problems if ...

It's a bit more expensive per kwh than the LiFePOWER4 batteries, but it has a lot of desirable features like self-heating, an outdoor rating, better electronics and ...

The basic eg4 LiFePower4 are the ones having issues with starting/sudden surges. It appears to be hit or miss as some have had issues with the battery going into short protection trying to start a vacuum ...

My neighbour has 2 EG4 LL"s (24v) and doesn't like them. His power will go off a couple of times a day, for unknown reasons, but the inverter fault says low DC voltage.

The main differences between the two series, besides the significant price difference, is that the EG4-LL has more on board electronics, a front mounted LCD readout display and a 10year warranty as ...

The LL or LL-S batteries cannot have a network cable with pins 4 and 5 terminated on it as this is what is causing the newer battery to trip. Pins 1& 2 are used for can/rs485 side comms between the battery"s ...
