Will IFC support Egypt's first utility-scale battery energy storage system?

Cairo, Egypt, June 15, 2025 - IFC today announced an investment to support Egypt's first utility-scale battery energy storage system (BESS), deepening its partnership with AMEA Power, a leading renewable energy developer in Africa, the Middle East, and Central Asia, and the Government of Egypt to advance the country's clean energy ambitions.

Does AMEA power have a solar project in Egypt?

The latest announcements bring Amea Power's total renewables capacity in Egypt to 2 GW of solar and 900 MWh of BESS. The company claims to have projects in 20 countries, with a pipeline above 6 GW and 1.6 GW currently in operation and under or near construction.

What is AMEA power doing in Egypt?

Amea Power, based in Dubai, is developing two large-scale renewable projects in Egypt after securing two PPAs with Egyptian Electricity Transmission Co. The first project involves a 1 GW solar plant with a 600 MWh BESS in the Benban area.

Which solar projects are being built in Egypt?

The first project involves a 1 GW solar plant with a 600 MWh BESS in the Benban area. The second project is a 300 MWh BESS at the site of Amea Power's 500 MW Abydos solar array, which is currently under construction. Both projects are in Egypt's Aswan governorate.

Dubai-based developer Amea Power has agreed to build a 1 GW solar plant with a 600 MWh battery energy storage system (BESS) and an additional 300 MWh BESS. Meanwhile, ...

The project, unveiled on June 15, 2025, is spearheaded by the International Finance Corporation (IFC) in partnership with AMEA Power and the Government of Egypt. It forms a key ...

Smart Home Energy Management Systems (SHEMS) play a critical role in reducing household energy consumption. However, existing solutions often depend on complex infrastructure ...

energy projects in Egypt. 900MWh battery energy storage systems (BESS). Dubai, United Arab Emirates;

September 12th, 2024: AMEA Power, one of the fastest-growing renewable energy ...

High renewable energy penetration targets cannot be achieved without more reliance on energy storage technologies. This study provides a long-term tec...

Egypt has been looking at a number of ways to store electricity as part of its ambitions to grow renewable energy capacity to cover 42% of the country's electricity needs by 2030. These include ...

The BESS supports the solar power facility in Aswan Governorate in Egypt. Officials said the project is Egypt's first utility-scale integrated solar and storage installation.

Egypt stands at the forefront of renewable energy expansion in the MENA region, with ambitious targets to increase the share of renewables in Egypt's energy mix to 42% by 2030 and ...

The battery system forms part of Egypt's 4GW Emergency Renewable Energy Program, which aims to meet rising electricity demand and reduce dependence on imported natural gas.

IFC today announced an investment to support Egypt's first utility-scale battery energy storage system (BESS), deepening its partnership with AMEA Power, a leading renewable energy ...
