Should I buy a portable electric car charger?

If you have an electric vehicle, it's worth investing in a portable electric car charger, or spare EV charger, so you have backup charging options. Use a level 1 charger in a normal 120-volt household outlet or charge your car faster with a level 2 charger in a special 240-volt outlet. Level 2 charging takes about half the time of level 1 charging.

How much does an electric car charging station cost?

A typical price for a Electric Vehicle Charging Station is \$324 but can range from approximately \$170 to \$700. These Electric Car Chargers are the most popular among Lowe's entire selection. While these are popular, we recommend ensuring that the Electric Car Chargers you consider have the right mix of features and value.

How do you charge an EV at home?

Most modern EVs ship with a Level 1 charger, which you can toss in your trunk (or frunk) and plug into any standard wall outlet. But the fastest way to juice up an EV at home is to use a Level 2 charger, which can add four or more times as many miles per hour of charge.

How much does EV charging cost?

Trust us, you'll want to be charging at home as much as possible. This has two significant benefits: Charging can be accomplished when the vehicle is otherwise parked, and home charging is substantially cheaper (roughly one-third the cost) of DC fast-charging. On average, EV charging equipment will have an up-front cost of between \$400 and \$700.
