At the end of May 2020, there were 1,173 publicly accessible electric vehicle charging stations in Poland (2,208 points). 33% of them were fast DC charging stations, and 67% slow AC chargers of 22 kW or ...

The Polish government has announced three large-scale funding programs to support the country's transition to EVs, with a focus on freight and commercial vehicles.

The Plan proposes solutions that will develop the charging infrastructure to the level that will provide consumers with certainty that electric vehicle is just as functional as the combustion vehicle.

Poland's electric vehicle (EV) market is witnessing a remarkable surge in 2024, with significant growth in both the number of EVs and the expansion of charging infrastructure.

With over 50,000 electric vehicles and over 4400 charging points the Polish market is still in a very nascent stage of development in terms of sustainable transport.

In order to achieve this goal, the market of electric and conventional vehicles in Poland are discussed. This
