From pre-panelized and prefabricated wall assemblies to slab-to-slab connections or embedding into curtain walls and window walls, our cladding solution has been incorporated into projects around the ...

Innovations in customized and sustainable solar panels for architectural projects that transform solar aesthetics and broaden architectural horizons.

It is composed of five multifaceted façades, each clad in a dynamic checkboard of glass and photovoltaic panels. The panels are installed at different inclinations, depending on the orientation of the façade, ...

What are solar facades? Solar panels on the facade are special photovoltaic panels that are integrated directly into the facade of a building. This innovative system not only offers a sustainable energy ...

Decorative wall panels feature a raised or flat design and can be added to any porch, sunroom, greenhouse, or other structure for a decorative look.

BIPV (Building-Integrated Photovoltaic) solar glass curtain walls combine energy generation with architectural aesthetics, ideal for modern building exteriors. They offer efficient power generation, ...

The system uses a high-performance BIPV solar panel that doubles as exterior cladding. Unlike rooftop systems, it requires no additional mounting and integrates seamlessly with the architecture.

As a fully integrated BIPV system, eFacade PRO delivers high energy output without compromising on durability with ranges from 7-18W/SF. The panels generate electricity directly from sunlight, helping ...

Customize your photovoltaic glass with Onyx Solar. Choose from a wide range of colors, sizes, transparency levels, and shapes to meet your aesthetic and energy needs. Tailor every detail to ...

Exterior wall photovoltaic power generation decorative panels

Solar Siding is a prefabricated, all-in-one system that integrates all the layers of the wall with a power generating exterior material. The perforated metal skin helps ventilate the cavity of the wall - helping ...
