The high flexibility of the test platform allows for a variety of long term component and equipment electrical testing in well controlled environmental conditions.

The new partnership will include launching a new international solar-powered generator competition in October to showcase innovation in the market as part of the Global LEAP Awards, which promote ...

ZE-Gen and CLASP will launch a new international Solar Generator competition with \$100k in innovation prizes under the Global LEAP Awards, to showcase high-performing and efficient ...

Techniques for coupling TEGs to various renewable energy systems are analyzed. Application of TEGs in various industrial, domestic, and commercial sectors are discussed. Current ...

A global inventory of utility-scale solar photovoltaic generating units, produced by combining remote sensing imagery with machine learning, has identified 68,661 facilities -- ...

Ever wondered why solar power research teams from Sweden to Singapore are suddenly as busy as bees in springtime? From Tokyo to Texas, international scientists are cracking the code for cleaner ...

Morningtest is a leading environmental chambers and solar panel testing equipment manufacturer integrating mechanical design, electrical development, software development and precision ...

A new international partnership between ZE-Gen (the Zero Emissions Generators initiative) and CLASP has been launched today to transform the solar generator market, by ...

What extreme conditions can IP65 solar generators truly handle? See 9 brutal tests that prove their weatherproof durability for reliable off-grid power.
