France is aiming to increase its solar PV capacity from 11.5 GW in March 2021 to 23 GW by the end of 2023. The country offers feed-in tariffs for small-scale solar PV up to 100 kWp on rooftops for self ...

This fact sheet summarizes key developments of the French PV market in 2024, including the addition of 6 GW of new PV, a fall in module prices, the impact of corporate PPAs, and changes in support ...

Excluding self-consumption, solar electricity production represented 6.2% of French electricity consumption for the first three quarters of 2024.

France is aiming to increase its solar PV capacity from 11.5 GW in March 2021 to 23 GW by the end of 2023. The country offers feed-in tariffs for small-scale solar PV up to 100 kWp on rooftops for self-consumption, with a specific grid tariff for collective users and exemption from the domestic tax on electricity for projects under 1 MW. However, a proposal to reduce solar PV subsidies for ongoing projects until 2030 has created controversy, affecting the sector's growth despite the target of reachin...

In 2023, the PV energy capacity in France amounted to approximately 20.5 gigawatts, making France the fifth European country for cumulative PV capacity that year. Despite this high ...

This graph provides an annual and monthly overview of solar power generation in France. The evolution of solar photovoltaic generation is an important parameter in the energy transition, as it is a ...

The continued growth in France's solar capacity highlights the nation's firm commitment to its renewable energy targets. With a substantial pipeline of projects and growing integration of ...

Mandatory photovoltaic (PV) deployment on large parking lots and commercial rooftops under the 2023 APER law, combined with the national 60 GW target in the draft PPE3 plan, adds ...

Complete 2025 ranking of top solar companies in France featuring Grace Solar at #3. Detailed analysis of

market leaders, technologies & regulations.

French solar power generation system

Explore how solar power is accelerating France's green energy transition in 2025, with national goals, incentives, and future trends shaping a sustainable energy future.
