Paris/Houston, February 9, 2026 - TotalEnergies has signed two new long-term Power Purchase Agreements (PPA) to deliver 1 GW of solar capacity - equivalent to 28 TWh of renewable ...

Concentrating Solar Power Update NREL is moving to 100-kW demonstration in an ARPA-E-funded 100-hour thermal energy storage project in sand. The technology has a 95% round-trip efficiency, ...

The two 15-year power purchase agreements cover a 805 MW and a 195 MW solar project, set for construction this year, that will power data centers in Texas belonging to Google.

Elon Musk targets 100 GW of annual solar manufacturing for both Tesla and SpaceX within three years to solve the energy bottleneck threatening the AI revolution.

TotalEnergies has agreed to deliver 1 gigawatt of solar capacity to Google's Texas data centers under 15-year power purchase agreements, marking its largest U.S. renewable PPA to date.

For instance, at the end of 2023, there were over 150.5 GW of wind power and 137.5 GW of solar photovoltaic (PV) total in the United States. To help put this number in perspective, it's important to ...

We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U.S. power grid in 2025 in our latest Preliminary Monthly Electric Generator Inventory ...

In the context of renewable energy, it represents the scale of electricity generation from sources like solar, wind, hydro, geothermal, and biomass. For example, a 1 GW solar farm can ...

TotalEnergies has signed two long-term power purchase agreements with Google to supply 1 GW of solar capacity to power the tech group's data centers in Texas over 15 years. The ...

Global solar installations have now surpassed 2.26 TW, with over 47% of capacity added in the past three

GW-level solar power

years, the latest Snapshot of Global PV Markets 2024 report shows. The study ...
