-----  
What is solar retrofit?

Solar retrofit is the process of upgrading existing solar energy systems to improve their efficiency, functionality, or capacity. This can involve modifications such as adding new solar panels, power optimisers or inverters to meet increased energy demands or enhance system performance.

Does Georgetown University have a solar energy plan?

Through a 15-year power purchase agreement, the university has pledged to purchase 100,000 megawatt-hours of electricity annually from these solar plants. This commitment not only helps Georgetown University reduce its carbon footprint but also demonstrates its support for renewable energy sources.

Does Georgetown University have a solar farm?

Georgetown University has taken a significant step towards sustainability by collaborating with several solar farms along the East Coast. Through a 15-year power purchase agreement, the university has pledged to purchase 100,000 megawatt-hours of electricity annually from these solar plants.

Why should you choose Growatt for solar retrofitting?

This holistic approach to energy management enhances cost-effectiveness and energy independence for EV owners. As one of the world's leading solar solution suppliers, Growatt offers several solutions for solar retrofitting, ensuring that existing solar systems can meet diverse energy needs effectively.

For procurement managers and project teams working on solar power systems, choosing the right photovoltaic grid cabinet is a high-stakes decision. A poor choice can result in failed ...
