This pilot aims to secure an initial 50 MW of capacity, providing opportunities for residential and small commercial customers to add solar and storage resources. The goal is to ...

Abstract--This paper presents an optimization approach to maximize the value of behind-the-meter energy storage that is owned and operated by customers. The objective of the optimization...

Georgia Power announced that construction is underway on 765 megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, ...

Georgia Power recently announced that construction is underway for four new battery energy storage systems in strategic counties across the state to support energy capacity needs.

The Georgia Institute of Technology and Stryten Energy announce the successful installation of Stryten Energy's Lead Battery Energy Storage System at the Carbon Neutral Energy ...

With BTM distributed energy sources available, the utility is able to pull power from ESS's at locations where the demand is at its highest while saving the energy in other locations for another time.

Georgia Power is building 765 MW of battery storage in four Georgia counties, boosting grid reliability and increasing renewable energy.

Georgia Power announced that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd ...

The Georgia Institute of Technology and Stryten Energy announce the successful installation of Stryten Energy's Lead Battery Energy Storage System at the Carbon Neutral ...

Georgia behind-the-meter energy storage system

Georgia Power is enhancing grid reliability and sustainability through Battery Energy Storage Systems (BESS), supporting clean, safe, and affordable energy for 2.8 million customers ...
