Israel's Augwind Energy has announced plans to build the world's first commercial-scale AirBattery energy storage facility in Germany, marking a major breakthrough in the race to...

Israeli company Augwind Energy is planning to build the world's first commercial-scale "air battery" in Germany, using underground salt caverns to store compressed air for electricity generation.

Germany is quietly pioneering what may become the most transformative energy-storage technology of the 21st century: a next-generation, salt-and-air "AirBattery."

Augwind will build the world's first commercial-scale AirBattery in Germany. This CAES system offers months-long energy storage, revolutionizing grid stability with renewables.

Augwind Energy, based in Israel, will build the "world's first commercial-scale AirBattery system" in Germany. The battery will use compressed air stored in salt caverns to generate...

With the AirBattery, we're introducing a storage solution that finally matches the scale and rhythm of renewable energy. Germany's redundant salt caverns, industrial leadership, and climate ...

Israeli company Augwind Energy today unveiled its plans for the first commercial AirBattery project in Germany. According to the company, the facility will be the world's first industrial-scale ...

Germany's ambitious renewable energy goals require robust storage solutions to manage the intermittent nature of solar and wind power. The salt-and-air battery technology ...

July 2025 -- Germany will become home to the world's first commercial-scale AirBattery, a long-duration energy storage system developed by Israeli company Augwind Energy.
