Thanks to their low exterior light reflectance the products are widely used for modern glass facades where high reflectance is prohibited or undesirable. Where a safety glass is required, the products ...

Onyx Solar is the global leader in manufacturing photovoltaic glass for buildings. We develop solutions for the integration of photovoltaic solar energy into buildings (BIPV).

BIPV (Building Integrated Photovoltaic) is a technology that integrates photovoltaic system into building materials or buildings, which is a type of distributed photovoltaic power station.

Let the light in with Mitrex Solar Glass -- a powerhouse in disguise, where photovoltaics meet limitless design, where color meets clarity. You're not just choosing glass; you're choosing a future where ...

Laminated glass and solar glass serve different purposes but are both essential in modern building design. Laminated glass is prized for safety and security, while solar glass ...

Configurations Insulating Laminated Glass. Viracon insulating laminated glass provides the solar performance of an insulating unit, combined with the safety and security features of laminated glass.

Saflex Solar PVB interlayers offer superior solar control, reducing heat gain and UV radiation while maintaining high visible light transmittance for laminated glass.

Take a look at how solar control glass and laminated glass - either individually or combined - help to maintain a comfortable home, with views and natural light and reduce the risk of overheating and ...

Laminated glass with S-LEC(TM) Solar Control Film guarantees clear views and allows for excellent light transmittance with blocking IR. Whether you need to work, teach, cook, or craft, there is no ...

Laminated glass with PVB for safety and insulation. Insulated glass with chambers for thermal efficiency.
