-- Today the Solar Energy Industries Association (SEIA) is unveiling a new policy agenda that details the critical actions that local, state, and federal leaders must take to strengthen the ...

The "50 States of Grid Modernization" quarterly report from NC Clean Energy Technology Center identified policy trends related to US grid modernization across the 2025 legislative session.

A policy primer exploring how energy storage technologies work, the benefits that storage can deliver to the electric grid, the current legal and regulatory barriers to adoption, and policy ...

Solar-Plus-Storage Analysis For solar-plus-storage--the pairing of solar photovoltaic (PV) and energy storage technologies--NLR researchers study and quantify the economic and grid ...

The Department of Energy's (DOE) Energy Storage Strategy and Roadmap (SRM) represents a significantly expanded strategic revision on the original ESGC 2020 Roadmap.

SEIA has released a policy blueprint which it claims would "strengthen the reliability of America's electric grid with solar and storage."

Storage can play a significant role in achieving these goals by serving as a "non-wires alternative" that can provide added reliability and grid services as renewable resources such as wind ...

We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U.S. power grid in 2025 in our latest Preliminary Monthly Electric Generator Inventory ...

In order to systematically assess the economic viability of photovoltaic energy storage integration projects after considering energy storage subsidies, this paper reviews relevant policies in ...

Advancing energy storage policies, programs, and regulations to accelerate an equitable clean energy

Grid Photovoltaic Energy Storage Policy

transition. Tomorrow's clean and renewable electric grid will be built on a foundation of ...
