How does infrastructure and economic development affect the adoption of electric cars?

Regional disparities in infrastructure and economic development affect the adoption of electric cars, with low-income developing countries experiencing slow growth in electric vehicle adoption due to lack of necessary infrastructure (Rajper and Albrecht, 2020).

Does user awareness affect adoption of electric vehicles?

Moreover, according to the meta-regression findings, user awareness had significantly positive impact on the average adoption of all types of electric vehicles. Thus, according to the median and mean effects, user awareness could have a significant effect on adopting electric vehicles.

What should policy-makers consider when adopting electric vehicles?

Policy-makers must consider the perspectives for future global electric vehicle adoption based on their benefits (e.g., not emitting pollutants, increasing energy security, decreasing fuel price fluctuations, and better performance). Various recommendations can be made to policy-makers.

Which drivers lead to adopting electric cars?

The findings showed that the main drivers would lead to adopting electric vehicles. In response to the first research question, it is important to note that environmental awareness, user attributes, barriers, and user awareness have a significant effect on the adoption of electric cars, including BEVs, PHEVs, and HEVs.
