Their core solar technology is engineered to withstand the harshest Australian remote environments--ensuring reliable performance anytime, anywhere in the world.

Equipped with integrated solar panels, LiFePO4 batteries, and a high-efficiency refrigeration system, it provides stable, low-temperature storage for agriculture, food distribution, logistics, and ...

Equipped with integrated solar panels, LiFePO4 batteries, and a high-efficiency ...

Our ready-to-connect, portable solar-powered electricity generators come in a wide range for use in the military, agriculture, pumping and for providing electricity to rural areas.

Built for longevity, the SolaraBox solar container is built to withstand harsh environmental conditions and ensure a reliable power supply. The SolaraBox mobile solar container is a portable solar power plant ...

A commercial heat-resistant solar carport kit designed specifically for high temperature and high humidity climates in Vietnam, using corrosion-resistant hot-dip ...

Power up your off-grid lifestyle with a mobile solar container. Find out how the Meox 20ft container with foldable solar panels can provide a reliable source of electricity in rural or remote areas.

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail system and no ...

Our solution can store agricultural products such as fruits, vegetables, herbs, seeds, and other commodities at the required optimal temperature and relative humidity. Thanks to our modular and ...

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the

High-Temperature Resistant Solar Container for Rural Use

inside, a rugged inverter with power ready battery bank.

Solar energy-based cold storage systems are now becoming technologically and economically viable alternatives to grid power and can be deployed in far-off remote places.
