Why is Schaeffler launching a high voltage inverter brick?

With the launch of volume production of the high voltage inverter brick in Tianjin,China,Schaeffler has reached an important milestone in its electrification strategy. This first volume production is for a leading Chinese car manufacturer that is going to equip its new electric vehicle models with ultra-modern inverter brick technology.

What are the performance characteristics of Schaeffler inverter bricks?

The performance characteristics of the inverter brick now being produced are impressive: At customer's request, Schaeffler increased the output of the block by increasing the maximum possible battery voltage to much more than the usual 800 V - and with RMS currents of up to 650 A, which turn the sub-module into a compact power pack.

What is a Schaeffler inverter subassembly?

The Schaeffler inverter subassembly is the essential power device building block(brick) to control the electric drive via logic signals. This is where the high-frequency current pulses are produced that set the vehicle's electric motor in motion.
